

Skyline Design fabricates glass to alter the way it transmits light in the built environment, creating transparency, translucency, and opacity.

TECHNIQUES

Eco-etch

Skyline Design's proprietary, environmental etching process creates a translucent effect.

AST Digital Printing

Skyline Design's proprietary digital technology prints translucent imagery with vast color capabilities.

Texture

Deep, consistent texture coated with a matte or gloss finish diffuses light.

Vitracolor

Skyline Design's proprietary, low-VOC back-painting process ensures uniform, vibrant color.

CUSTOMIZATION

Most glass patterns are available in both horizontal and vertical orientations. Changing the pattern scale and/or configuration, or using custom colors may incur an additional charge.

TYPES OF GLASS

Clear Tempered Safety Glass
Low-iron PPG Starphire® Tempered Safety Glass

APPLICATIONS

Skyline Design offers glass applications in nearly any glass thickness, type, or make-up, including monolithic and laminated, fire-rated, mirrors, and more. Our decorative finishes may be applied to tempered glass to meet safety and building code requirements. Maximum fabrication size is limited to 72" x 144" (60" x 120" for AST Digital Printing). Certain applications may not be available on all glass types and/or thicknesses. Surcharges may apply to oversized or heavy glass.

SUBMITTING CUSTOM COLOR

We can match virtually any color. To submit a custom color, simply send the code (Pantone, Paint, or other) to your Skyline Design Representative. If the color does not have a code, you may send a physical sample.

SPECIFICATION

We encourage you to contact us directly to provide specifying instructions for all our glass, as well as custom specs for your client's bid-set documents.

DISCLAIMER

Skyline Design encourages you to contact us directly with specific instructions and custom specifications for our glass products. However, Skyline Design cannot guarantee that it has the ability to manufacture products to each customer's exact specifications. No claims or promises are made about Skyline Design's ability to replicate custom artwork, color or other technical specifications. Skyline Design's products are hand and machine crafted with quality and care. Our products are made to order, and individual pieces may have unique variances in color, tone and depth.

All product illustrations on the Website are examples, to indicate pattern scale, density, and approximate designs. We take care to provide you with accurate descriptions of color and images of our products. However, all drawings, dimensions, samples, descriptive matter and specifications are intended as guides only. For example, it may be possible that the color of an item may be different from the photos shown on your screen. Some of the product images on the Website are digital renderings. Because they are not real photographs, the final product can have a different color or surface texture than appears online. Also, actual applied finishes and techniques may affect the overall appearance of finished products.

In addition, Skyline Design owns a broad range of intellectual property rights associated with its designs, processes and products. Any unauthorized use or copying may violate or infringe Skyline Design's intellectual property rights.

Skyline Design reserves the right to change, alter, or modify the design, dimensions, construction, or cost of any item without prior written notice.
