

Skyline Design is able to fabricate glass with custom patterns or imagery that you provide. The guide below explains how to prepare your files.

Please contact a Skyline Design Representative with any questions.

Vector Image

- CMYK color mode
- Created at size or at a proportional scale
- Text converted to outlines (or expanded)
- Raster effects must be at least 150ppi
- **.AI** or **.PDF** file
- In layers, if applicable

Raster Image

- Digital photo - highest native resolution image
- No interpolation, no resizing
- Color corrections, image editing permitted
- Leave in RGB color mode highest megapixel (from camera) count possible

Raster Illustration

- Minimum 100ppi at full scale with no interpolation
- **.TIF** or a print ready **.PDF** preferred
